THE PRESIDENT'S MESSAGE. - We published resterday the President's special message an and giving the reasons for that step. The mer the President has yet communicated to the atule are worthy of the feebleness of its mat As a defense of the reception of Padre Vijl is utterly worthless. It is worse than nothing to only effect will be to excite the derision fireign powers and the contempt of our It is the finishing atroke to the Pres dest's slender reputation for states His disgraceful incompetency is here exhibit

It will be conceded on all sides that the Pres ident convicts himself of deliherate self-st fication. The avowed principle upon which has received Padre Vill is in flat and palpabl radiction with the avowed principle up nuity of sophistry can reconcile the two concile them. He simply leaves the yawnin tisans. The width of this awful chasm is ap parent upon the slightes; comparison of th chich Col. French was rejected is thus state

The principle upon which Padre Vijil h

They inherited from thair ances'o Marcy, under direction of the President, ce-Coveryment was not a legitima'e one becruaforeign citizens participated and there was no eviden s that the natives of their own free will approved it, and the President now declares for priests not to their liking. They are no elf that it is against our policy to "go be- hypocrites, but plain, outspeaking and outset hand the fact of a foreign government exercising the American Council last summer, we wer he was directed by the President to say that of the Louisiana delega ion, strongly in fav-Covernment he did not deem it proper to receive any one as its minister, and the President that he has just received Padre Vijil as minaster from that Government, aithough he omits to indicate any evidence of its approval by the ciri- to receiving members anding upon the platdicate any evidence of its approval by the cirzans which he did not possess when he rejected
Col. French, and holdly amountes that "i is
the established policy of the United States to
recognize all Governments without question of
their sowrer or their organization or of the means
by which the governing persons attain their
power." The President rejected Col. Fresch
mainly on the ground that "those who were
chiefly instrumental in suspencing or overthrowing the former Government of Nicaragua were
not citizens belonging to it." and he receives
of their order or to support him for cifice, but not citizens belonging to it," and he icceives of their order or to support him for office, but 'hey will do neither unless convicced that he been added by foreign ratervention or not." Dd n the Poje of R me, and they cannot be conever a same person befool time of this scheme-lessly in the face of mankind before? The President is certainly demented.

President is certainly demented.

After the rejection of Col. French upon the principle publicly announced by Mr. Marcy, the simple and the only ground upon which a Minister from the Rivas-Walker Government could have been consistently received was that the citizens of Nicaragua had in the meastime "freely expressed their approval" of the Government; and the President's vindication of his reception of Padre Vill, if if twee possible to conventions, we have published one d terminous conventions, we have published one d terminous conventions, we have published one d terminous conventions. reception of Padre Vijil, if it were possible at all, obviously consisted merely in showing that such approval had actually occurred. His churse was plain, but he has writully mistaken it. Instead of showing or attempting to show that the Rivas-Walker Government now perfectly conforms to the standard below. it. Instead of showing or attempting to show that the Rivas-Walker Government now perfectly conforms to the standard of legitimacy by which he condemned it three months ago, which would have covered the whole case and preserved his consistency, at least upon paper, the President contents filmself with coolly assuming that it does, and, in the teeth of Mr. Marcy's declaration, announcing still more coolly that it is not our policy anyway to inquire into the legitimacy of 'a foreign Government exercising actual power!" Not satisfied with evacing the real point, he impales him elf upon a constructive one. As if it were not enough to plead guilty in silence, he npens his mouth to condemn and humiliate himself the beneath the fully of a half-way blunder. He inaists upon writing himself down an ass in a ctyle that he who runs may read. And he has had his own way.

S. Craig, Esq, for Commonwealth's attorney
These gentlemen are siready well and favorably known to the voters of the district. They have fully and faishfully performed the detues of the offices for which they have been nominated and have received the approbation of the whole public. The convention could not have selected candidates more eminettly qualified for the offices of judge of the circuit court and Commonwealth's attorney nor can any be found who can be more acceptable to the people of this district regardless of party predilections. They will be elected almost by acclamation. Of ludge Bulleck we have recently liad occasion to speak. His preeminent fitness for the office of circuit judge is unquestioned. His great legal acquirements, his professional industry, his strict integrity and impartiality, and his fit in hutmild manner of administering the law, has not only won the respect of his constituents but has endeared him to them so much that they are unwilling to permit him to leave the office of circuit court judge for any consideration.

The President, in his veto of the St. Clair flats bill sent to the Senate to day, say, in considering it under the Constitution, that the power of Congress to construct works of internal improvements initiated to cases in which work is manifestly needful and proper for the execution of some one or more of the powers expressly delegated to the General Government. I have not been able to find for the proposed expenditure any such relative power, unless it be power to provide for the common defense and to maintain the army and navy. But a careful examination of the subject, with the aid of information officially received since my last innual message was communicated to Congress, has considered me that the expenditure would serve in valuable purpose as contributing to the common defense, because all which could be effected by it would be to afford a channel of but 12 feet depth and of so temporary a character that unless the work was done immediately the necessity for its use would not arise 1 could not be relied on for vessels of even small draft, the passage of which it would permit.
